governance

Easy, efficient **Microsoft 365** **Governance**

Empower everyone to reach their business goals with Rencore's **leading SaaS tool** for centralized, flexible, and automated **Microsoft 365 governance**

Software
built in
Germany

Stay in control of Microsoft 365

What is Rencore Governance?

Enforce your governance policies over all Microsoft cloud services. Track what's happening in your tenant, uncover violations to your rules, and automate the resolution process.

Deep service inventory

Automatically extract and bucket a wide range of M365 data into object topics and discover their relations.

Clear reporting & insights

Turn collected data into comprehensive reports, group reports into dashboards, and tailor for various stakeholders.

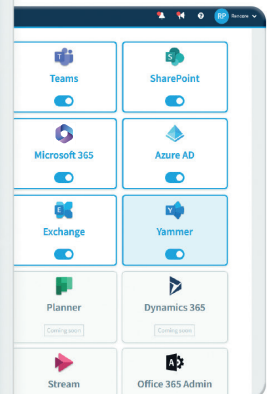

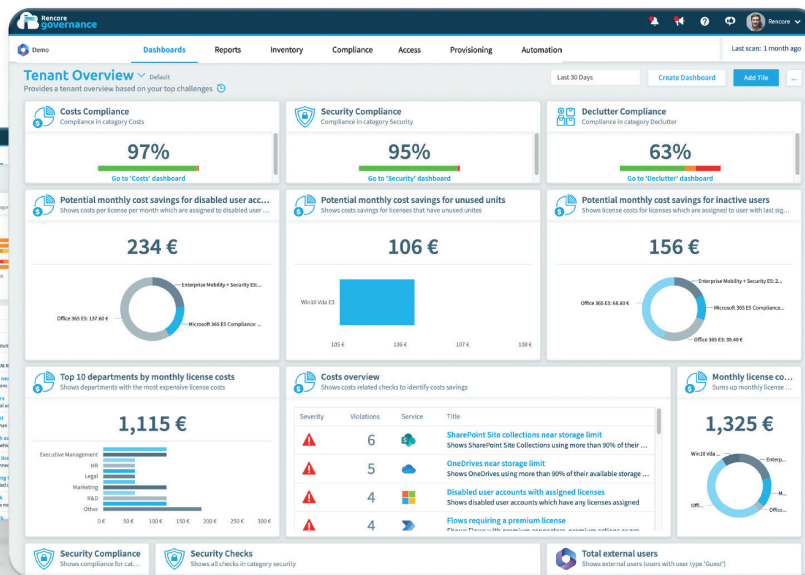

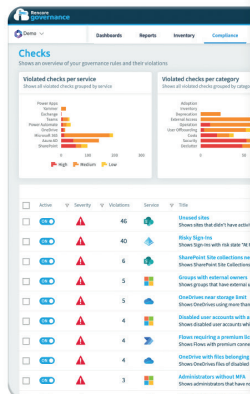

Simple compliance

Use prebuilt and customizable Policy templates built from best practices around the most requested use cases and monitor against violations.

Advanced automation

Automatically resolve violations and automate the communication process to address critical activities.

The one platform to govern your Microsoft cloud

Who benefits from using Rencore Governance?

The Organizational Governance Ecosystem:

IT admin team

- Quickly report on and monitor the governance posture of your Microsoft 365
